

## 0.3mm-3.0mm Color Coated Roofing Sheet Easy Install Galvanized Corrugated Panel PPGI

### Our Product Introduction

for more products please visit us on [prefabricated-containerhouses.com](http://prefabricated-containerhouses.com)

#### Basic Information

- Place of Origin: china
- Brand Name: INFINITE STARS
- Model Number: H
- Minimum Order Quantity: 7 Sets
- Price: dollar2-4 /1
- Delivery Time: 1-3work days
- Payment Terms: D/A, L/C, D/P, T/T, Western Union, MoneyGram
- Supply Ability: 10000 /day

#### Product Specification

- Quality: Hc
- Corrosion Resistance: Dgft
- Weather Resistance: Strong
- Uv Resistance: High
- Color: All
- Material: Aluminum/steels
- Installation Method: Screw Fixing
- Warranty: 10 Years
- Corrosion Resistance: Excellent
- Durability: High
- Thickness: 0.3mm-3.0mm
- Fire Rating: Class A
- MOQ: 7 PCS
- Highlight: 3.0mm Color Coated Roofing Sheet, Galvanized Corrugated Panel Easy Install, Galvanized Corrugated Panel PPGI

## Product Description

### China Quality Factory Export Roofing Sheet Color Coating Galvanized Corrugated Panel PPGI

**Product Description:** Galvanized Corrugated Metal Roofing Galvanized corrugated metal roofing is a versatile and durable building material designed for roof covering and wall cladding applications. It is manufactured from high-quality galvanized steel, which undergoes a process of zinc coating to enhance its corrosion resistance and longevity. **Key Features:** **Material:** Galvanized corrugated metal roofing is crafted from galvanized steel sheets, which are coated with a layer of zinc to protect against rust and corrosion. This zinc coating provides exceptional durability, ensuring long-lasting performance even in harsh environmental conditions. **Design:** The distinctive corrugated profile of the roofing panels adds strength and rigidity to the material while also creating a visually appealing aesthetic. These panels are available in various thicknesses, widths, and lengths to accommodate different roofing requirements and architectural styles. **Installation:** Installation of galvanized corrugated metal roofing is straightforward, utilizing specialized fasteners or clips to secure the panels to the roof substrate. The lightweight nature of the material simplifies handling and reduces installation time, making it an efficient roofing solution for construction projects. **Advantages:** Galvanized corrugated metal roofing offers numerous advantages, including excellent weather resistance, fire resistance, and low maintenance requirements. Its durability and affordability make it a cost-effective choice for both residential and commercial roofing applications. **Applications:** Galvanized corrugated metal roofing is suitable for a wide range of applications, including residential homes, industrial buildings, agricultural structures, and commercial facilities. It provides reliable protection against the elements while enhancing the overall appearance of the structure. **Conclusion:** Galvanized corrugated metal roofing is a reliable and practical roofing solution that combines durability with aesthetic appeal. Its superior corrosion resistance and weatherproofing properties make it an ideal choice for various construction projects, providing long-term performance and value. This introduction highlights the key features and benefits of galvanized corrugated metal roofing, emphasizing its suitability for diverse construction applications.

Feature	Description
Material	Galvanized metal, providing durability and corrosion resistance
Type	Corrugated
Size	Standard size is 2 meters x 1 meter, but customizable
Thickness	Typically ranges from 0.2mm to 3.0mm
Color	Various color options available, such as red, green, blue, etc.
Surface Treatment	Choice of coated paint or galvanized
Weather Resistance	Durable and able to withstand harsh weather conditions such as sunlight, rain, snow, and wind
Installation	Suitable for various roof types, such as flat roofs, pitched roofs, etc.
Application	Suitable for residential buildings, commercial buildings, industrial buildings, etc.
Advantages	Lightweight and easy to carry, easy to install, cost-effective, aesthetically pleasing and durable

## Company introduction

As a wholly-owned subsidiary of Wujiang Saima (established in 2005), Suzhou Stars Integrated Housing Co., Ltd. focuses on foreign trade. As one of the most professional prefabricated house manufacturers in south-east China, we provide customers with all kinds of integrated housing solutions.

Equipped with complete production lines, including sandwich panel production machines and steel structure production line, with 5000 square meter workshop and professional staff, we already built long-term business with domestic giants like CSCEC and CREC. Also, based on our export experience in the past years, we are furthering our steps to global customers with best product and service.

As a supplier to overseas customers all over the world, we are very familiar with the manufacturing standards of various countries, such as European standards, American standards, Australian standards, and so on. We have also participated in the construction of many large-scale projects, such as recent 2022 Qatar World Cup camping construction.
