## Product Description

The 95 115 Model Color Steel Rock Wool Sandwich Panel, available in various thicknesses ranging from 50mm to 150mm, offers numerous advantages in the construction industry. It boasts excellent thermal insulation, effectively maintaining indoor temperature stability and reducing energy consumption. Its waterproof and moisture-resistant properties protect buildings from dampness. The panel also provides superior sound insulation, creating a quieter and more comfortable environment. Its customizable options cater to different project needs, while its environmentally friendly materials support sustainability. Although the initial investment may be higher, its long-term cost-effectiveness and reliability justify the investment. In summary, the 95 115 Model Color Steel Rock Wool Sandwich Panel is a versatile and efficient choice for construction projects.

### Company introduction

As a wholly-owned subsidiary of Wujiang Saima (established in 2005), Suzhou Stars Integrated Housing Co., Ltd. focuses on foreign trade. As one of the most professional prefabricated house manufacturers in south-east China, we provide customers with all kinds of integrated housing solutions.

Equipped with complete production lines, including sandwich panel production machines and steel structure production line, with 5000 square meter workshop and professional staff, we already built long-term business with domestic giants like CSCEC and CREC. Also, based on our export experience in the past years, we are furthering our steps to global customers with best product and service.

As a supplier to overseas customers all over the world, we are very familiar with the manufacturing standards of various countries, such as European standards, American standards, Australian standards, and so on. We have also participated in the construction of many large-scale projects, such as recent 2022 Qatar World Cup camping construction.
