

Antique Color Steel Tile Roof Polyurethane Tiles Chinese Wind Modular Plate

Our Product Introduction

for more products please visit us on prefabricated-containerhouses.com

Basic Information

- Place of Origin: china
- Brand Name: INFINTE STARS
- Certification: CE/ISO9001/ISO45001/ISO14001
- Model Number: B
- Minimum Order Quantity: 7 Sets
- Packaging Details: Each 40 foot high cabinet can hold 1200 square meters
- Payment Terms: L/C, T/T
- Supply Ability: 100000 /day

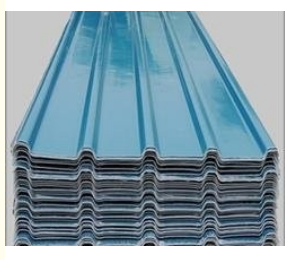

Product Specification

- Application: Roofing, Wall Cladding, Partition Wall, Cold Storage, Etc.
- Color: Customized
- Surface Treatment: PE/PVDF Coating
- Width: 1000mm
- Length: Customized
- Water Absorption: $\leq 2\%$
- Thickness: 50mm
- Sound Insulation: $\geq 30\text{dB}$
- Material: Color Steel
- Load Bearing Capacity: $\geq 0.5\text{kN/m}^2$
- Model: HW-SP-001
- Thermal Conductivity: 0.022 W/mK
- MOQ: 7 PCS
- Highlight: **Antique Color Steel Tile Roof,**
Color Steel Polyurethane Tiles

Product Description

Color Steel Roofing Panels are premium roofing solutions designed for durability, versatility, and long-lasting performance. Constructed from high-grade steel alloy, these panels feature a corrosion-resistant coating that ensures superior resistance to harsh weather conditions. Available in a wide range of standard and custom colors, the panels offer a sleek and modern aesthetic that complements any building design.

The smooth, matte, or textured finishes of the Color Steel Roofing Panels provide a visually appealing surface that is easy to maintain. The lightweight yet sturdy construction of the panels allows for quick and efficient installation, reducing labor costs and project timelines. The panels are designed with overlapping or side-lap joints for secure installation, ensuring a tight and leak-free roof.

Additionally, the Color Steel Roofing Panels feature a coating that provides excellent UV protection, keeping the color vibrant and long-lasting. This coating also reflects heat, reducing solar absorption and helping to keep buildings cooler, thus reducing the need for energy-intensive cooling systems.

Our Color Steel Roofing Panels meet or exceed local building code requirements, including fire ratings and wind load ratings. They are suitable for both residential and commercial applications, providing a cost-effective and reliable roofing solution. With their durability, versatility, and aesthetic appeal, Color Steel Roofing Panels are the perfect choice for any roofing project.

Specification	Description
Material	High-grade steel alloy with corrosion-resistant coating
Colors	Available in a wide range of standard and custom colors
Finish	Smooth, matte, or textured finishes available
Thickness	0.4mm to 0.8mm (customizable)
Width	Standard widths of 1000mm, 1200mm, and 1500mm (customizable)
Length	Panels can be cut to specific lengths upon request
Coating Type	Polyester, PVDF, or other advanced coatings for superior durability
Fire Rating	Meets or exceeds local fire rating standards
Wind Resistance	Classified for various wind load ratings (depending on thickness and installation)
Thermal Resistance	Reflects heat, reducing solar absorption and keeping buildings cooler
UV Resistance	Coating provides excellent UV protection for long-lasting color
Installation	Panels are designed for easy installation with overlapping or side-lap joints
Accessories	Includes clips, fasteners, and other accessories for secure installation

Specification	Description
Warranty	Standard warranty of 10-20 years, depending on coating and usage

Company introduction

As a wholly-owned subsidiary of Wujiang Saima (established in 2005), Suzhou Stars Integrated Housing Co., Ltd. focuses on foreign trade. As one of the most professional prefabricated house manufacturers in south-east China, we provide customers with all kinds of integrated housing solutions.

Equipped with complete production lines, including sandwich panel production machines and steel structure production line, with 5000 square meter workshop and professional staff, we already built long-term business with domestic giants like CSCEC and CREC. Also, based on our export experience in the past years, we are furthering our steps to global customers with best product and service.

As a supplier to overseas customers all over the world, we are very familiar with the manufacturing standards of various countries, such as European standards, American standards, Australian standards, and so on. We have also participated in the construction of many large-scale projects, such as recent 2022 Qatar World Cup camping construction.
