Basic Information

- Place of Origin: china
- Brand Name: INFINTE STARS
- Certification: CE,ISO9001,ISO45001,ISO14001
- Model Number: H05
- Minimum Order Quantity: 7 Sets
- Price: dollar50000 /1set
- Packaging Details: Tailored to individual preferences
- Delivery Time: 5-8work days
- Payment Terms: L/C, T/T
- Supply Ability: 200set/day

Product Specification

- Name: Prefab Steel House Villa
- Water Proof: Yes
- Material: Steel
- Installation: Quick And Easy
- Roof: Sloping
- Design: Modern
- Type: Customizable
- Style: Modern
- Inside Wall: Gypsum Board
- Fireproof Proof: Yes
- Basic Insulation: Glass Wool R2.5
- Windows: Double Glass Alum. Sliding Windows
- Bracing: Round Bar, Angle Steel
- MOQ: 7 PCS
- Highlight: **Durable Prefab Steel House,**

Product Description

Remarkable Durability Prefab Light Steel Villa House Individual Tastes

Description

Firstly, they place a strong emphasis on environmental sustainability and energy efficiency. These villas are constructed using energy-efficient materials and incorporate cutting-edge technologies. With their insulated walls and roof systems, they excel in thermal performance, reducing dependency on heating and cooling systems. This not only saves energy but also contributes to lower carbon emissions.

Secondly, these villas offer remarkable construction speed and efficiency. The prefabricated components, manufactured in a controlled factory environment, allow for quick and seamless assembly on-site. This significantly reduces construction timeframes compared to traditional methods, saving both time and resources.

Furthermore, prefabricated light steel villas demonstrate exceptional structural strength and durability. The lightweight steel framework is designed to withstand extreme weather conditions, such as high winds and seismic events, ensuring the safety of occupants. The corrosion-resistant steel material also enhances the longevity of the building.

Lastly, these villas provide flexibility in design. They can be easily customized to cater to individual tastes, needs, and site-specific requirements. This versatility allows for the creation of a personalized living space that perfectly aligns with the occupant's lifestyle and preferences.

Feature	Description
Customization	Tailored to individual preferences, allowing campers to personalize their outdoor retreat with custom features.
Beauty	Designed with aesthetics in mind, featuring a charming and inviting appearance that enhances the camping experience.
Convenience	Engineered for quick and easy installation, enabling campers to set up their cabin effortlessly at the campsite.
Durability	Constructed with high-quality steel materials, ensuring durability and weather resistance for long-lasting performance.
Comfort	Equipped with modern amenities and comfortable furnishings, providing campers with a cozy and relaxing living space.
Versatility	Suitable for various camping locations, including campgrounds, national parks, wilderness areas, and private campsites.
Sustainability	Built with eco-friendly materials and energy-efficient features, promoting sustainable camping practices and eco-friendly living.

Company introduction

As a wholly-owned subsidiary of Wujiang Saima (established in 2005), Suzhou Stars Integrated Housing Co., Ltd. focuses on foreign trade. As one of the most professional prefabricated house manufacturers in south-east China, we provide customers with all kinds of integrated housing solutions.

Equipped with complete production lines, including sandwich panel production machines and steel structure production line, with 5000 square meter workshop and professional staff, we already built long-term business with domestic giants like CSCEC

and CREC. Also, based on our export experience in the past years, we are furthering our steps to global customers with best product and service.

As a supplier to overseas customers all over the world, we are very familiar with the manufacturing standards of various countries, such as European standards, American standards, Australian standards, and so on. We have also participated in the construction of many large-scale projects, such as recent 2022 Qatar World Cup camping construction.
